Professional Summary

Full-stack Software Engineer with experience building scalable reporting and analytics platforms in agile, cross-functional teams. Experienced with React.js, Python, SQL, and Java-based systems, including contributing to microservice architectures. Certified Unity Developer transitioning into game development, actively building and publishing games on Unity Play. I focus on writing clean, maintainable code and optimizing performance. I'm driven by solving real-world problems and continuously learning. I enjoy building thoughtful, user-focused products and working closely with others to bring ideas to life.

Experience

Software Engineer Full Stack Aug 2023 – Jul 2025
KPMG *Dublin, Ireland*

- Designed and developed scalable full-stack financial reporting tools using React, Python, and SQL.
- Part of the team that integrated microservices to enhance performance, resulting in a 60% increase in user productivity.
- Collaborated cross-functionally to deliver maintainable, business-critical features at scale.

Software Engineer Intern Mar 2022 – Sept 2022
TEAMWORK.com *Cork, Ireland*

- Contributed to improving services and enhancing iOS mobile app functionality within an Agile team, including bug fixes.
- Played a key role in developing an internal chat app, successfully released to over 12,000 users.

IT and Computer Engineer Level 1 Jun 2021 – Oct 2021
PFH Technology Group *Cork, Ireland*

- Assisted in cybersecurity operations for the HSE and Irish Defence Forces.
- Conducted audits and helped secure infrastructure for government clients.

Projects

Unity Game Development Jan 2026 – Present
Game Projects *Unity, C#, Unity Play*

- Developing and publishing games using Unity, focusing on 2D/3D game mechanics and player interactions.
- Building interactive gameplay systems and publishing completed projects on Unity Play platform.

Community Cloud for Knowledge Sharing May 2023
Cloud Learning Platform *React.js, Node.js, AWS, MongoDB*

- Built a secure, scalable platform for peer-to-peer learning and knowledge exchange.
- Implemented real-time content tracking and user progress analytics.

Technical Skills
